Subject:
PMC Contractors – Letter of Recommendation

To Whom It May Concern:

PMC Contractors & I were first introduced by a developer & landlord representative in 2009. I am always wary of contractors with whom I have never worked, but from the very beginning, PMC has communicated & performed above & beyond the industry standard. Since that time, we have worked on several challenging projects together, the end results of which I have been proud to put my firm's name on. Their ability to coordinate & work with various suppliers, corporate personnel, & shrinking timelines has been outstanding. PMC's professionalism, ethics, & standards of quality have been of the highest caliber.

The projects we have completed together have been in some of the most restrictive jurisdictions in the nation. Despite the obvious obstacles, from difficult clients, to unreasonable building officials, to dryrot & termite damage, PMC has handled each incident with care, insight & respect. Their attention to the client's needs have been their strongest asset. They do not just talk about performing, they actually produce the quality jobs they commit to. I have witnessed construction schedules completely beyond reason that PMC has managed to adhere to, though I don't recommend that to anyone.

I highly recommend PMC Contractors to anyone who needs a contractor with integrity & the ability to be true team players. They are dependable & consistently produce quality workmanship that clients deserve for their development dollar.

Please feel free to contact me for more information on these outstanding contractors.

Sincerely,

David E. Frink, AIA
